

FOR IMMEDIATE RELEASE

NOSHOK DIAPHRAGM SEALS PART NUMBER & WEBSITE UPDATE

Berea, Ohio (March 11, 2010) To simplify and streamline the ordering process, NOSHOK announces the restructuring of part number configurations for our diaphragm seal line, effective immediately.

We have also expanded the diaphragm seal representation on our website, including specifications and detailed ordering information (click [here](#)).

The new part numbering system is consistent with well-known industry abbreviations and formatting, and provides a more concise and user-friendly ordering process. Material designator abbreviations have been reduced to just one industry-standard letter, and designations have been consolidated to reduce hyphens.

Available in metallic and non-metallic materials, NOSHOK offers a broad range of diaphragm seals in a variety of configurations to accommodate various media, pressure & temperature requirements.
