## Press Release

FOR IMMEDIATE RELEASE

## RELIABLE ELECTRONIC TEMPERATURE MEASUREMENT

**Berea, Ohio (December 7, 2010)** The NOSHOK 800 Series Platinum Resistance Temperature Transmitter is ideal for immediate, accurate temperature measurement in applications including water systems, storage tanks, industrial machinery and machine tools, HVAC systems, and refrigeration systems.

Features and benefits include:

- Proven 100 Ohm platinum resistance sensor provides reliability, stability and unbeatable performance
- Economical price, quick response time
- Standard temperature ranges from -40°F to 1,000°F
- Wide variety of temperature ranges and connections
- Optional USB programmable output available
- 316 stainless steel housing for corrosion resistance, durability
- Burnout protected from 3.3 mA to 23 mA

The NOSHOK 800 Series Temperature Transmitter is also available with our 1800 Series Attachable Loop Digital Indicator for convenient local temperature indication. The attachable digital indicator utilizes the transmitter's 4 mA to 20 mA output signal and the Hirschmann connector, and is simply inserted between the transmitter body and the connector without the need for additional wiring or power source. The indicator is programmable to display a range of -1999 to 9999 and may be tilted for better viewing. It is also now available with an optional relay that is programmable through the front of the meter.

Optional Relay

*NOSHOK, Inc. is a leading supplier of pressure, level, temperature and force measurement instrumentation, along with needle & manifold valves, serving major industries around the world. Products include pressure gauges, pressure and temperature transmitters, transducers & indicators, pressure switches, needle valves, manifold valves, pressure snubbers, bimetal thermometers, force measurement sensors and diaphragm seals. These products meet and exceed the application requirements of OEM's and industrial users seeking exceptional quality, reliability and value.*
