

FOR IMMEDIATE RELEASE

NOSHOK ANNOUNCES NEW POLYMER DIAPHRAGM SEAL

Berea, Ohio (November 1, 2011) NOSHOK announces the availability of a new reduced pressure polymer diaphragm seal, which is ideal for wastewater and chemical feed applications as well as most applications with a corrosive media.

This seal protects pressure or vacuum instruments used on ultra-pure or highly corrosive fluid lines such as demineralized water, sulfuric acid, hydrochloric acid and caustics.

Applications include wastewater and chemical feed, deionized water systems, reverse osmosis systems, desalinization systems and electroplating.

Type 5 Reduced Pressure Polymer Diaphragm Seal details:

- Constructed of corrosion-resistant PP glass fiber reinforced upper housing and PP, PVC or PVDF lower housing
- Teflon™ coated EPDM diaphragms are standard on all assemblies
- 100% non-metallic wetted surfaces assures maximum chemical and temperature compatibility
- 1-year warranty

NOSHOK, Inc. is a leading supplier of pressure, level, temperature and force measurement instrumentation, along with needle & manifold valves, serving major industries around the world. Products include pressure gauges, pressure and temperature transmitters, transducers & indicators, pressure switches, needle valves, manifold valves, pressure snubbers, bimetal thermometers, force measurement sensors and diaphragm seals. These products meet and exceed the application requirements of OEMs and industrial users seeking exceptional quality, reliability and value.
