Pressure & Level • Temperature • Force • Needle & Manifold Valves • Diaphragm Seals

### NOSHOK ANNOUNCES STABILIZED & NON-STABILIZED CONNECTORS

**Berea, Ohio (September 29, 2014)** NOSHOK announces the availability of our new SZ Series Stabilized and Non-Stabilized Connectors.

These connectors are designed to reinforce the entire installation by shifting radial-stress load away from the NPT connections, and are available in 3-3/8" and 5" lengths.

NOSHOK SZ Series Stabilized & Non-Stabilized Connectors are available in zinc-nickel plated carbon steel and 316 stainless steel, and feature slotted bolt holes that allow for 2-1/8" and 2-1/4" bolt spacings.

A new single piece dielectric gasket (DK1) is now available as an option to create a non-conductive shield between the process piping and the instrument. A two piece dielectric kit (DK2) is also available as an alternative when a separate sealing gasket or o-ring is required
