NOSHOK ANNOUNCES PROTECTIVE ELECTRICAL CONNECTOR CAGE FOR HAMMER UNION TRANSMITTER

Berea, Ohio (June 26, 2015) Electrical Connector Cages are now available from NOSHOK as an optional accessory to our 628 Series Intrinsically Safe Hammer Union Transmitters.

Hammer Union Transmitters are used in a wide variety of harsh and viscous oil & gas exploration and drilling applications both onshore and offshore. Due to the demands placed on these sensors, shock and vibration resistance are key in their design.

Although NOSHOK Hammer Union Transmitters are ruggedly constructed, this optional Electrical Connector Cage provides additional protection to help guard the electrical connection from damage caused by hammer blows while loosening or tightening the hammer union.

For more information on this product or other NOSHOK Measurement Solutions, contact NOSHOK Customer Support at 440.243.0888, visit our website at www.noshok.com, or e-mail info@noshok.com.
