NOSHOK ANNOUNCES NEW VALVE PRODUCTS AND ACCESSORIES

Berea, Ohio (June 17, 2016) NOSHOK is pleased to announce the availability of several new valve products and accessories including the 2530 & 5530 Series 90° Angle 2- and 5-Valve Manifolds, as well as a 9" ΔP to ΔP Adaptor and a Vertical to Horizontal Adaptor Kit.

The new **NOSHOK 2530 Series 90° Angle Double Flange Large Bore (0.375" orifice) Natural Gas Manifold** incorporates two isolation valves, providing additional isolation for applications that require redundancy. These NOSHOK large bore manifold valves feature a standard non-rotating stem tip and a soft seat design rated to 6,000 psi, as well as a replaceable Delrin® seat and straight through porting for easy roddable cleaning of the isolation valves.

The new **NOSHOK 5-Valve 90° Angle Double Flange Large Bore (0.375" orifice) Natural Gas Manifold** is an addition to our existing 5530 Series manifold offering. These manifolds are designed for use with differential pressure transmitters incorporating two isolation valves, two equalizing valves and a vent valve in natural gas applications. These valves are also rated to 6,000 psi.

NOSHOK has also added new valve accessories, including a **9" length, 3/8" bore Δ Pressure to Δ Pressure Adaptor** to accommodate various application configurations and space restrictions, and a **Vertical to Horizontal Adaptor Kit** which converts vertically mounted Stabilized Connectors to a horizontal position for mounting additional valves and instrumentation.
