FOR IMMEDIATE RELEASE

NOSHOK NEEDLE & MANIFOLD VALVE SOLUTIONS

Berea, Ohio (August 18, 2011) NOSHOK offers a full range of needle and manifold valves to provide precise flow management. Models include valves suitable for high pressure, high temperature and heavy-duty industrial applications.

NOSHOK carbon steel valves are among the first in the industry to come standard with zinc-nickel plating, an alloy which provides exceptional corrosion resistance. Other benefits of zinc-nickel plating include increased deposit hardness, extended wear resistance and longer service life. They are also WEEE and RoHS compliant.

NOSHOK Needle and Manifold Valve Details

- 3-year warranty
- Our mini valves feature a patented design which significantly increases the pressure rating up to 10,000 psi without compromising the flow coefficient (Cv)
- Hard seat, soft seat, and soft tip configurations available
- Standard and large bore orifice sizes available
- Carbon steel, stainless steel and brass materials available
- Custom designs available
- All NOSHOK valves are 100% helium leak tested to 1 x 10⁻⁴ ml/s for guaranteed performance and reliability, and conform to MSS SP-99 Instrument Valves Standards
- NOSHOK valves supplied with packing also conform to MSS SP-132 Compression Packing Systems for Instrument Valves Standard
- Made in the U.S.A.

NOSHOK, Inc. is a leading supplier of pressure, level, temperature and force measurement instrumentation, along with needle & manifold valves, serving major industries around the world. Products include pressure gauges, pressure and temperature transmitters, transducers & indicators, pressure switches, needle valves, manifold valves, pressure snubbers, bimetal thermometers, force measurement sensors and diaphragm seals. These products meet and exceed the application requirements of OEMs and industrial users seeking exceptional quality, reliability and value.
