

## **NOSHOK Announces New Extreme High Pressure Gauges**

**Berea, Ohio (November 6, 2018)** NOSHOK's new generation 402/502 Series Extreme High Pressure Gauges are in compliance with the new DIN 16001 standard, which specifically addresses extreme high pressure ranges starting at 30,000 psi.

NOSHOK's Extreme High Pressure Gauges exceeded the minimum requirements of the specification by more than 20 times in our qualification cycle testing. These gauges are backed by our extended warranty.

### **Features include:**

- Solid front design with a blow out back in accordance to EN837, S3 Safety Pattern
- Safety glass lens
- Ranges from 0 psi to 30,000 psi through 0 psi to 85,000 psi
- Most ranges available from stock for quick delivery
- Multiple scales are available

**Benefits include:**

- Improved load cycle stability
- Improved calibration stability
- Significantly longer service life
- Reduced down time

These features combine to provide higher safety levels, improved reliability and reduced maintenance costs, resulting in a lower total cost of ownership.
