

INSTRUMENTATION SOLUTIONS

for the Automotive Industry

For over half a century NOSHOK, Inc.

has been a leading manufacturer of pressure, level and temperature measurement instrumentation, along with instrument valves.

Our vast product offering includes pressure gauges, along with pressure and temperature transmitters and transducers. We also offer temperature and pressure switches, and needle and manifold valves.

Our new PT10 Series OEM Fixed Range Pressure Transmitters are ideal for applications requiring a high quantity of transmitters.

NOSHOK Instrumentation Solutions for the Automotive Industry

- Common applications include:
 - Fluid exchange equipment
 - Air ride suspension kits
 - Air & electric tire presses
 - Robotic arm painting systems
 - Automatic car wash systems
- Custom manifold solutions:
 - Used to house transmitters, float switches, cartridge valves, solenoid valves and check valves
 - Act as the control center for the equipment

Other instrumentation options are available, contact NOSHOK for details
